

Dear Parents

Greetings from OPBMS!

It is believed that Design Thinking and Innovation will assume an ever more important role in the future of our world. It will help address, identify, and solve problems creatively, whatever the field or specialization. It would be useful to find solutions to issues both within one's own neighborhood and to issues at a National or Global level. It will also be a useful tool for us to move towards a creative economy in the coming years.

CBSE in collaboration with the Ministry of Education's Innovation Cell and Faculty of IIT Bombay has developed the Skill Module on 'Design Thinking & Innovation' for Middle school students (Classes VI -VIII). FAQs for this module are available on the CBSE Academic website and can also be accessed directly using the link: <https://cbseacademic.nic.in/skill-education-books.html>

With the 'Design Thinking & Innovations (DT&I)' Skill Module, CBSE aims at providing students with the tools and exposure to be able to address problems using the design thinking process. This module on 'Design Thinking & Innovations' is designed in such a way that students learn to acquire both knowledge of design and practice of skills required to develop an attitude towards design. It focuses more on hands-on knowledge learnt by doing and acting upon challenges discovered within the community and surroundings.

Interested students should fill their consent on the school mobile app latest by May 09, 2022 positively.

Warm regards
